Disclaimer

The ideas in this book are the author's observations and opinions and should not be taken as professional advice.

Redistributing this book

You are free to share this book with anyone you want. It's a free resource to the public. You can send it to your friends, you can print it out and give it to someone, and you can even give it away to your blog readers as long as you agree not to edit, re-create or attempt or call it your own.

Thank you for reading

I'm glad you're reading this because that means you are looking for a smarter, better way to live. This movement towards simplicity is helping people change their lives for the better on a daily basis. Thanks to people like you, it will continue to encourage and help others to live life on their own terms.

How this book works

You will find links throughout this book that will take you to third party websites where you can actually sign up for workshops and learn more about them. In some cases you will be using what's known as an affiliate link to get there. If you'd like to write me a note, I'd love to read it. My email is help@tinyhousetalk.com.

Introduction

How This Book Will Help You

This book was put together so that you can figure out if a tiny house workshop is right for you. And if so, show you the options on where and how you can attend one.

When you're done reading you'll know who's who in the tiny house world as well as your options in regards to gaining the confidence and knowledge to start and finish your tiny or small house project.

Why a tiny house workshop?

These construction workshops are designed for people like you and me, who love the idea of a house that demands very little from us.

For me, simple living has become a way for me to make a transition into a lifestyle where I have more control by consciously choosing and reducing the items I own and maintain.

The goal is to keep what you love and find another home for the rest. To get rid of not too much and have as close to what best serves us as possible. This way our time, monies, and energies are readily available for whatever we want to accomplish or create within our lives.

A tiny house, a small house, or just a simpler life, as a foundation for your future?

Without a shelter and food, what is man or a woman? How can one evolve without a proper shelter and nutrition?

Little homes along with technology are changing the way we think of home by making small more doable than ever before. I believe that the ideas behind the Tiny House Movement are a huge gift.

So let's do our part to make tiny and small homes more widely and easily available for those of us who want them now and in the future.

What You Might Learn at a Workshop

- How to build your house in the proper order to get the most out of your resources and time
 - The tools you will need to complete your project
 - How to use a trailer as a foundation
 - How to build on a normal foundation
 - How to protect against moisture during construction
 - Framing and sheathing
 - How to install siding correctly so it doesn't fall apart when you tow your house
 - How to choose the right insulation specific to your area and why
 - Where to find the right small space appliances, toilets and heaters
 - Information on the sizing of cabinets, doors, showers and toilets appropriate for tiny homes
 - How to get around building codes, zoning laws and how to meet public road requirements
 - How to find and prepare your trailer whether it's a flatbed, utility, recycled, or car hauling trailer
 - How to safely use Power Tools
 - Time and Money Saving Construction Tricks and Tips
-

Thank You

Thank you so much for reading this book. I believe in tiny and small houses. I know that we need more of them because they help people like you and me gain more freedom, peace, and happiness in our lives. Not to mention how good tiny is for the earth, too. So I'd love your help spreading the word on tiny housing. You can start by sharing this book on your Facebook or by sending it to a friend.

Free Updates

There are new workshops that are in the planning stages right now so this book will have a new edition very soon.

If you want me to let you know when that happens just enter your email over at <http://www.tinyhouseworkshops.com> and you'll be added to my email list.

In addition you'll receive my free daily tiny house newsletter which will keep you full of fresh new ideas and inspiration for small space living. I look forward to serving you again soon.

Spread the Word

This book is a free public resource so you are free to share it with as many people as you'd like to help us spread the word about tiny housing.

Feel free to share it with others in any way you'd like! The easiest way is to just point people to TinyHouseWorkshops.com. :)

Thank you so much,

Alex Pino
